

Training course on risk management methodology

Global Solutions

Risk management methodology

OVERVIEW

This course provides participants with an overview of the key elements involved in constructing and executing an effective enterprise risk management (ERM) system. Starting with organizational concerns surrounding corporate governance and transparency, the course provides the tools necessary for using risk management as a strategy informing mechanism. Particular focus will be given to the transformation of internal risk management and control mechanisms into effective devices for use within the ERM framework.

COURSE OBJECTIVES

To provide participants with an analytical methodology and tools for risk management, the course will focus specifically on the methodology employed by SACE to quantify, monitor and manage risks..

The participants will learn to:

- Essential technical and non-technical elements necessary for establishing an ERM program
- How risks are categorized, quantified, monitored and managed within SACE's framework
- Systems and procedures needed to track, monitor and manage those risks
- Technical provisioning and the life cycle policy

TUITION

Tuition will be provided by highly qualified professionals, with proven experience and comprehensive knowledge of the relevant fields. The course may be customized to meet the real needs of participants.

LOCATION

Upon request, at client's premises or in SACE's Rome office.
