

Training course on claims & recovery

Global Solutions

Claims & recovery

OVERVIEW

The collection of overdue payments from companies or banks in default of their payment obligations is a fundamental activity for an ECA. Overdue payments can be difficult to recover, especially in emerging markets. For this reason, experience is the key factor for implementing effective debt collection. SACE, acting through its affiliate company SACE SRV, has proven expertise in skip tracing, extra-judicial collection, judicial collection and insolvency procedures. Participants will be introduced to the SACE approach and methodology applied to real-life transactions.

COURSE OBJECTIVES

To provide participants with a clear understanding of the main features of debt collection and recovery services, the course will focus on several activities pertaining to different products (medium- to long-term and short-term debt) and the specific phases of recovery (extrajudicial, judicial or insolvency proceedings). Case studies and real-life examples will be used extensively to ensure that the course is highly interactive and practical.

The participants will be able to:

- Identify the main features of debt recovery activities for both medium- to long-term and short-term loans
- Understand the key elements of each specific recovery phase and the appropriate instruments used by SACE during each step
- Review internal procedures and decisional process

TUITION

Tuition will be provided by highly qualified professionals and executives with proven expertise based on work experience and comprehensive knowledge of the relevant fields.

LOCATION

Upon request, at client's premises or in SACE's Rome office.
